## What is CBD/How does it work?

Cannabinoids work naturally within our bodies to enhance the Endocannabinoid System (ECS) which is responsible for maintaining homeostasis/balance, facilitating healing and promoting optimum health. Cannabinoids that occur in our own bodies are Endocannabinoids and in the case of Cannabidiol (CBD) is called a Phytocannabinoids, as it is derived from a plant.

## What is CBD used for?

The medical benefits are remarkable and CBD shows promise in all facets of our body, from nurturing overall health and wellness to improving all types of pain, promoting regulation of the complex nervous system, cardiopulmonary, gastrointestinal, musculoskeletal, immune systems, and all disorders related to inflammation. CBD has strong antioxidant, neuro-protective and anti-aging properties.

## Conditions CBD may improve?

Cancer/Diabetes/Epilepsy/Tremors  
Muscle Spasm/MS/TBI/Parkinson's  
Alzheimer's Dementia/Pain/Chronic  
Pain/Arthritis/PMS/Anxiety/Crohn's/IBS  
Depression/PTSD/Insomnia/Headaches  
Fibromyalgia/Fatigue/Skin Conditions  
Addiction/Weight Loss/ADD/ADHD

CBD is also used to Maximize Athletic Performance, increase Energy/Focus/ Longevity and overall sense of Well-being and Quality of Life.

## Does CBD Really Work?

Cannabis has been used safely for thousands of years for numerous medical applications. However Cannabidiol (CBD) continues to gain support by the masses, as increased research, scientific breakthroughs and astounding evidence of significant medical benefits in virtually every system of the body is becoming clearly evident.

## Is CBD safe?

Current drug safety information concludes that CBD is not an intoxicant, does not interfere with psychomotor or psychological function and is well tolerated/safe even at higher doses. There has never been a recorded overdose, and side effects are minimal to nonexistent.

## Is CBD Legal?

All our products are legal to consume in the US. We only carry CBD products made from US grown industrial Hemp.
